

LIVA

Humanizing Interactions with AI Agents

Native Video Player Powering Real-
Time AI Avatars

PROBLEM

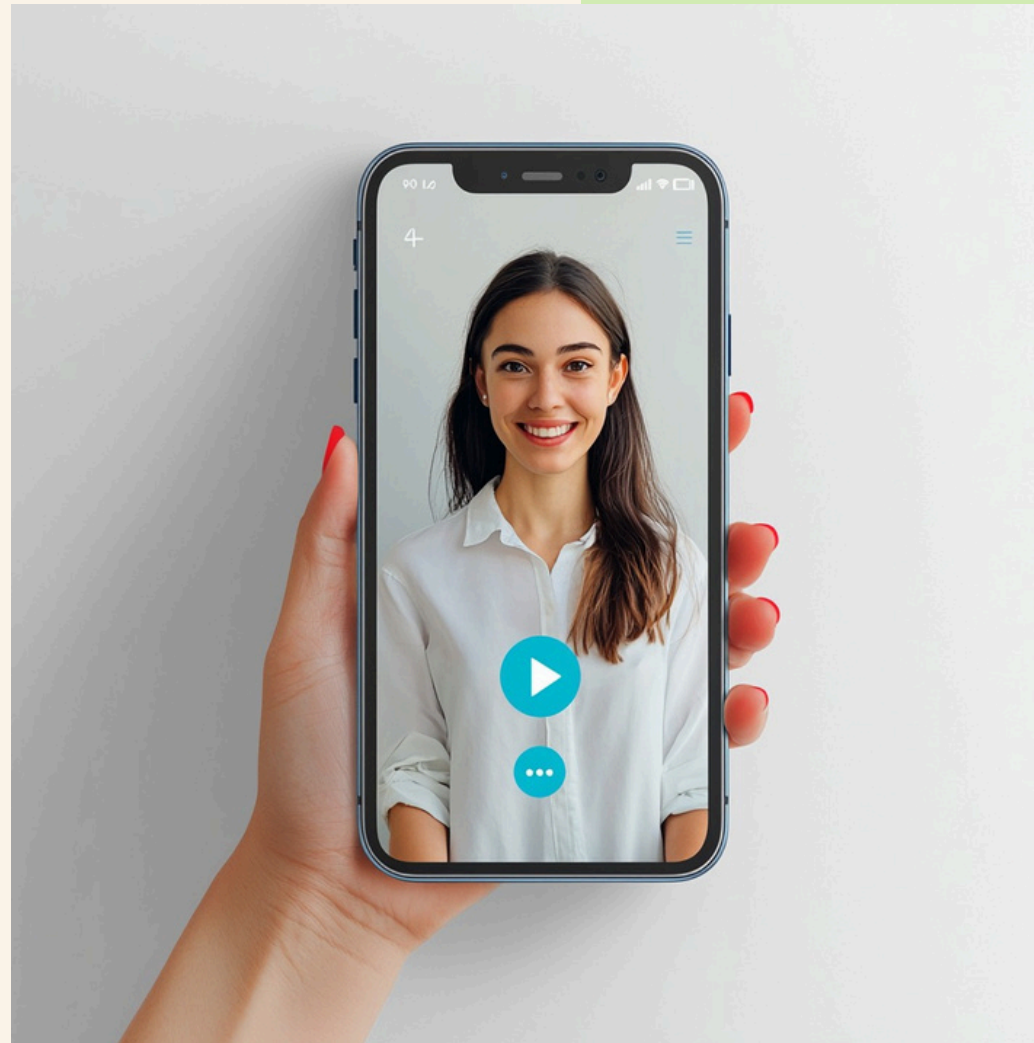

Real-time AI video interactions are **expensive** and **complex**.

Each instance of live agent requires **costly GPU infrastructure**.

Cloud processing causes **delays** of 2–5 seconds.

Options today offer limited customization with **high pricing** (~\$0.5/min).

No developer-friendly SDK exists for custom video streaming AI agents.

SOLUTION

Our tech **streams** video **natively** in the browser, eliminating server-side rendering.

It delivers **zero latency** by processing video directly on the device.

We achieve **significant cost savings** at \$0.001 per 1K tokens.

The **SDK** is **fully customizable** to work with any AI model and audio service.

Scalable deployment on any browser or device.

Introducing LIVA

World's first **browser-based video player** enabling **real-time** AI agent interactions.

Instantly renders **video visuals locally**, eliminating the need for **costly GPU infrastructure**.

Fully customizable SDK—**integrate seamlessly** with your preferred **LLMs** and audio APIs.

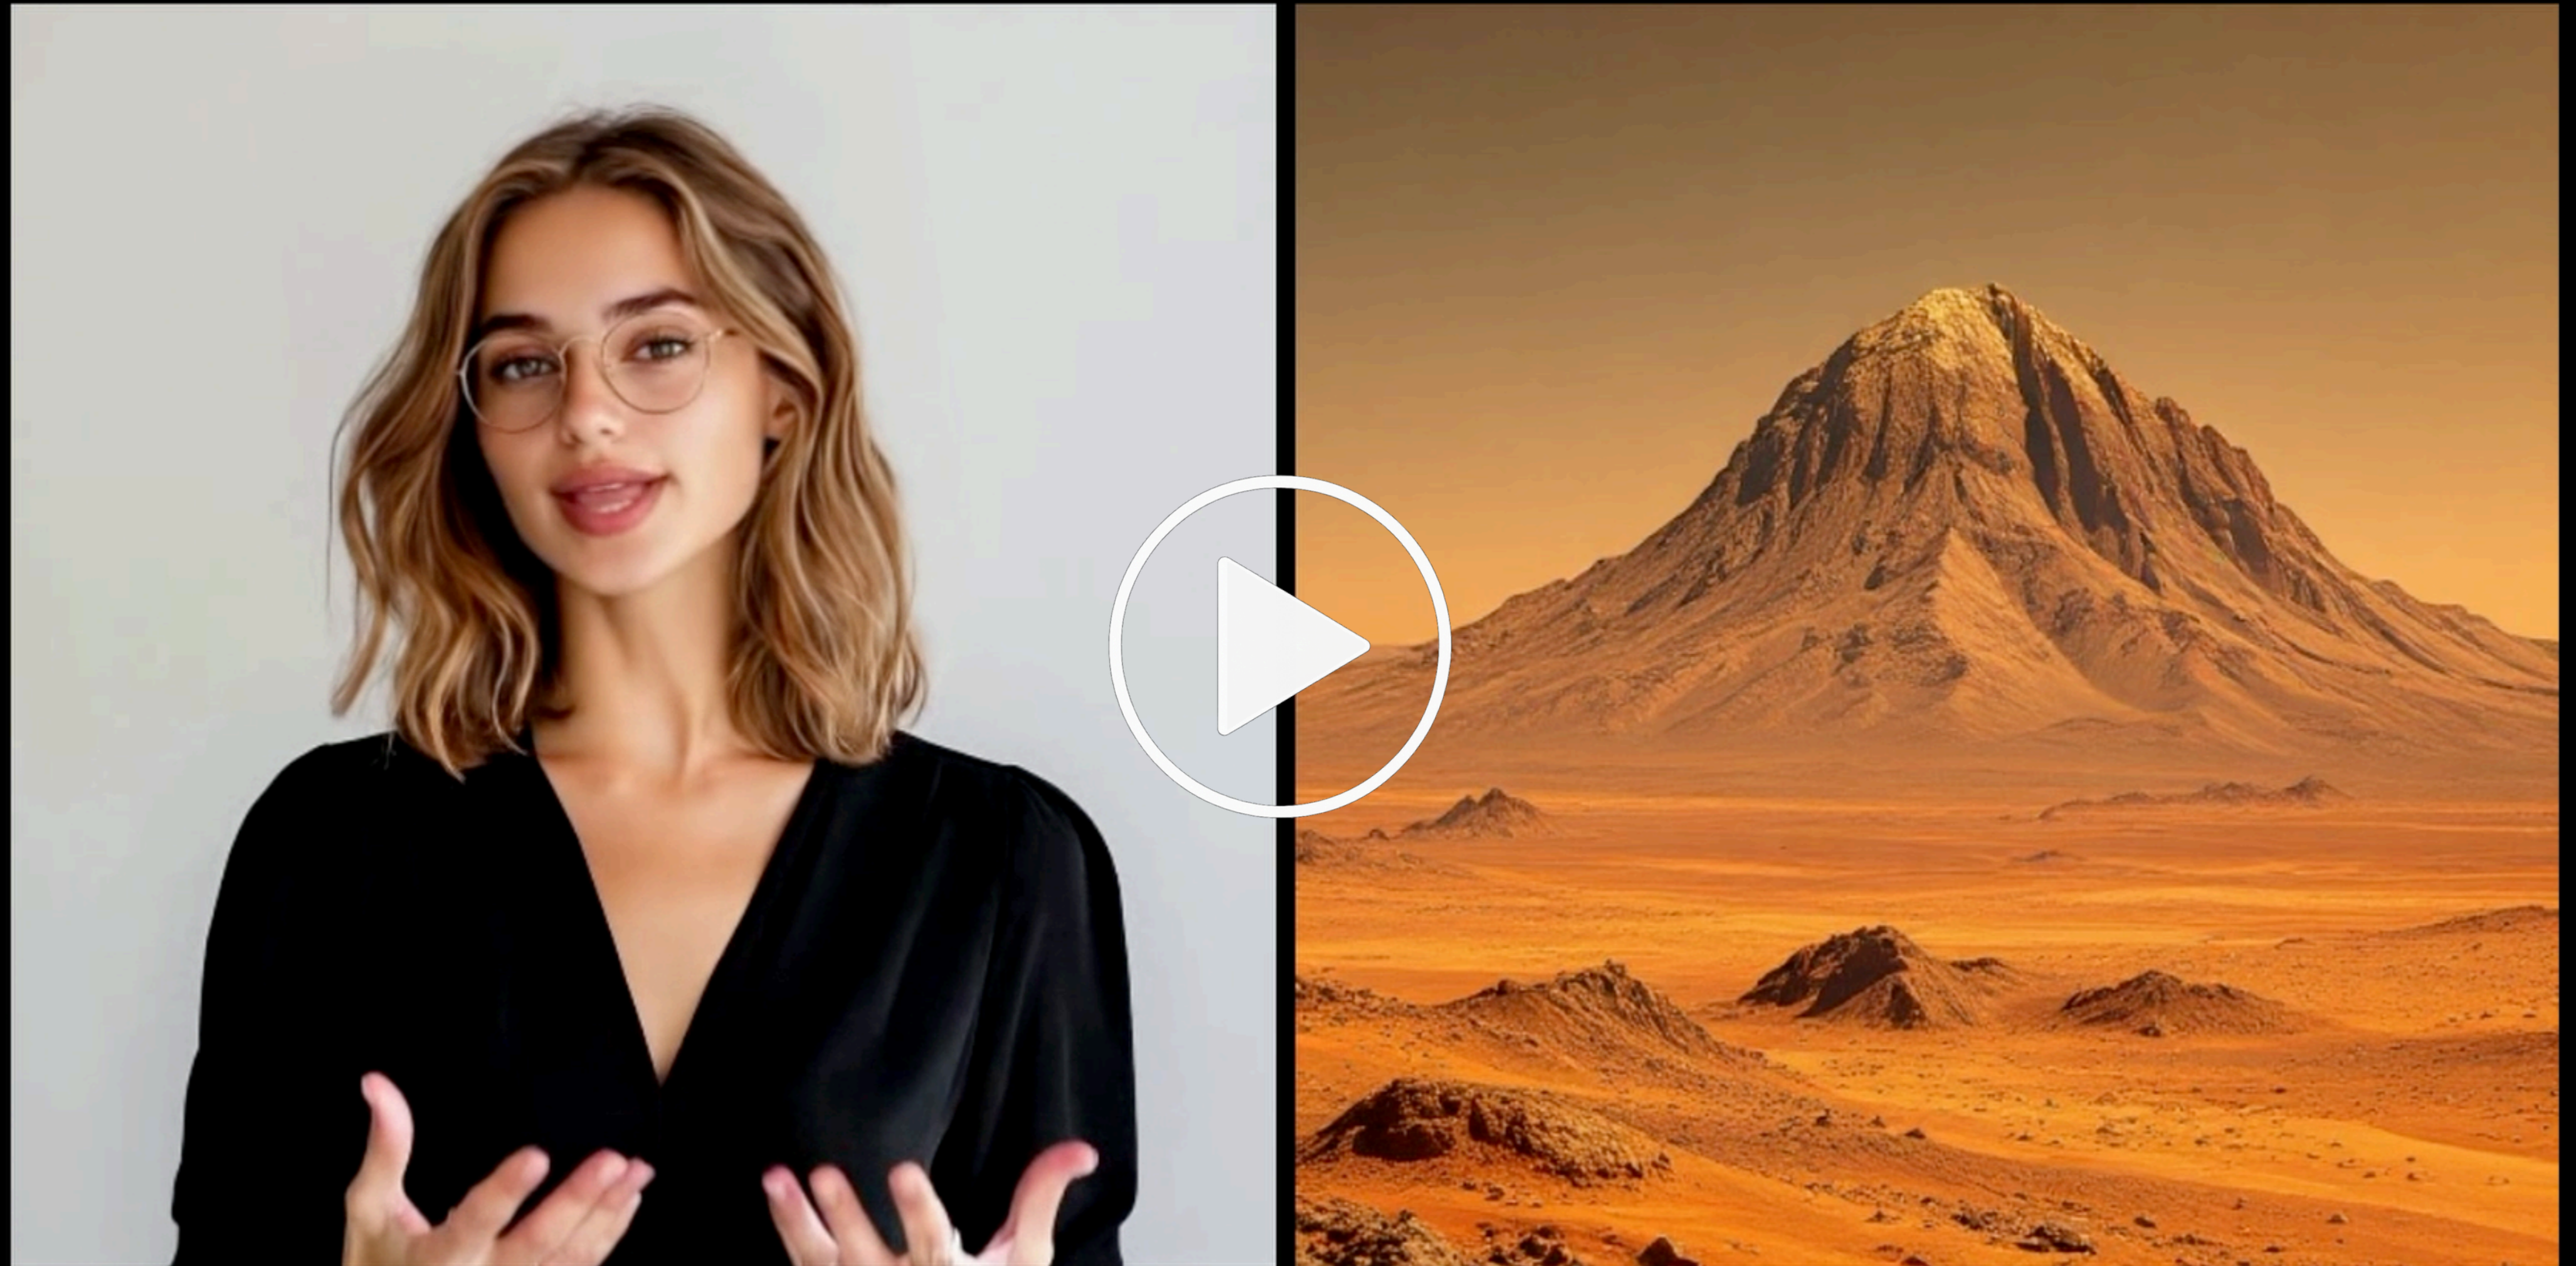

Enables complex, **multi-step conversations** through voice and text, visually.

Supports **live integrations** including **real-time web searches**, scheduling, and social sharing.

Scalable and **cost-effective deployment** across any browser or device.

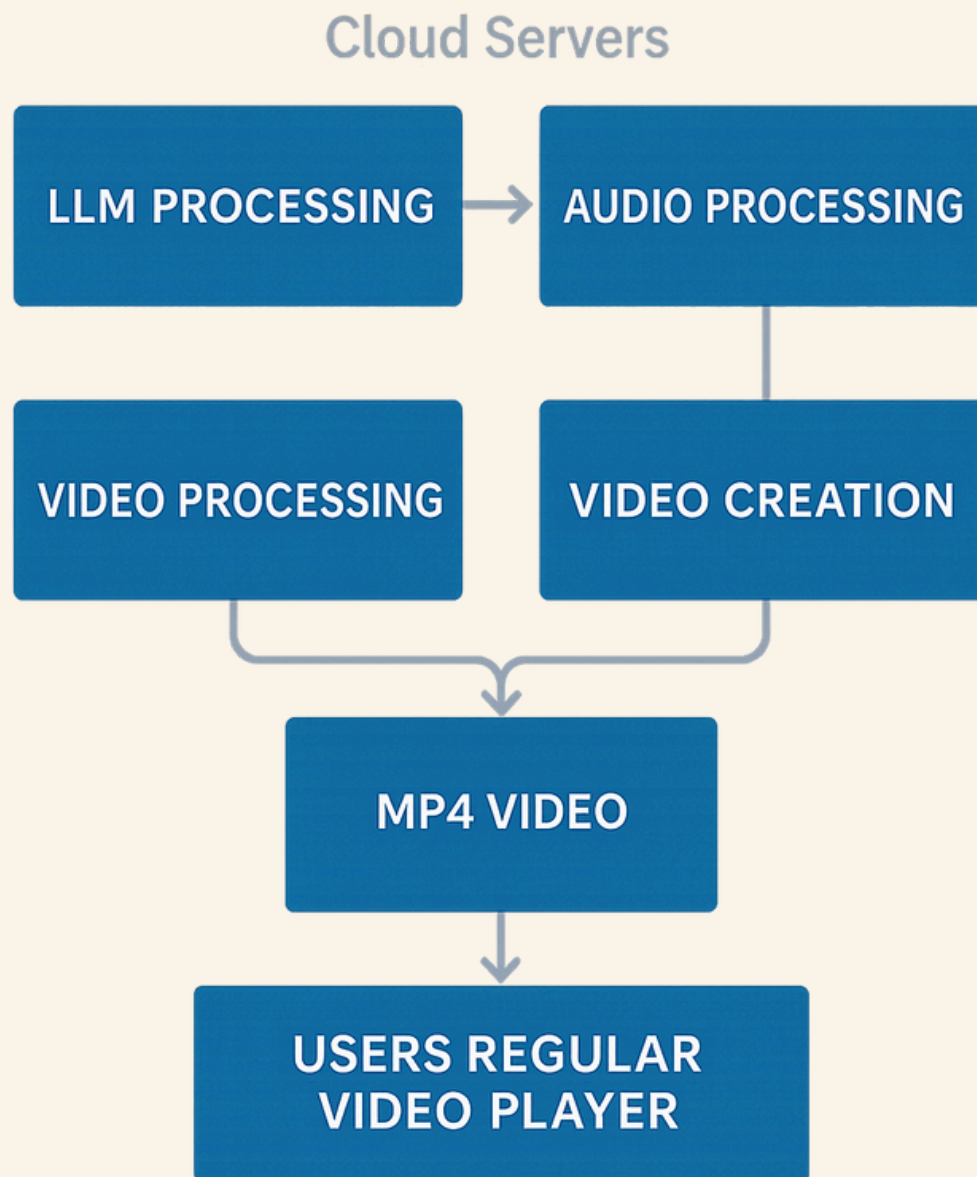

Demo Video

Mars has the largest volcano in the solar system, Olympus Mons, which is about thirteen miles high.

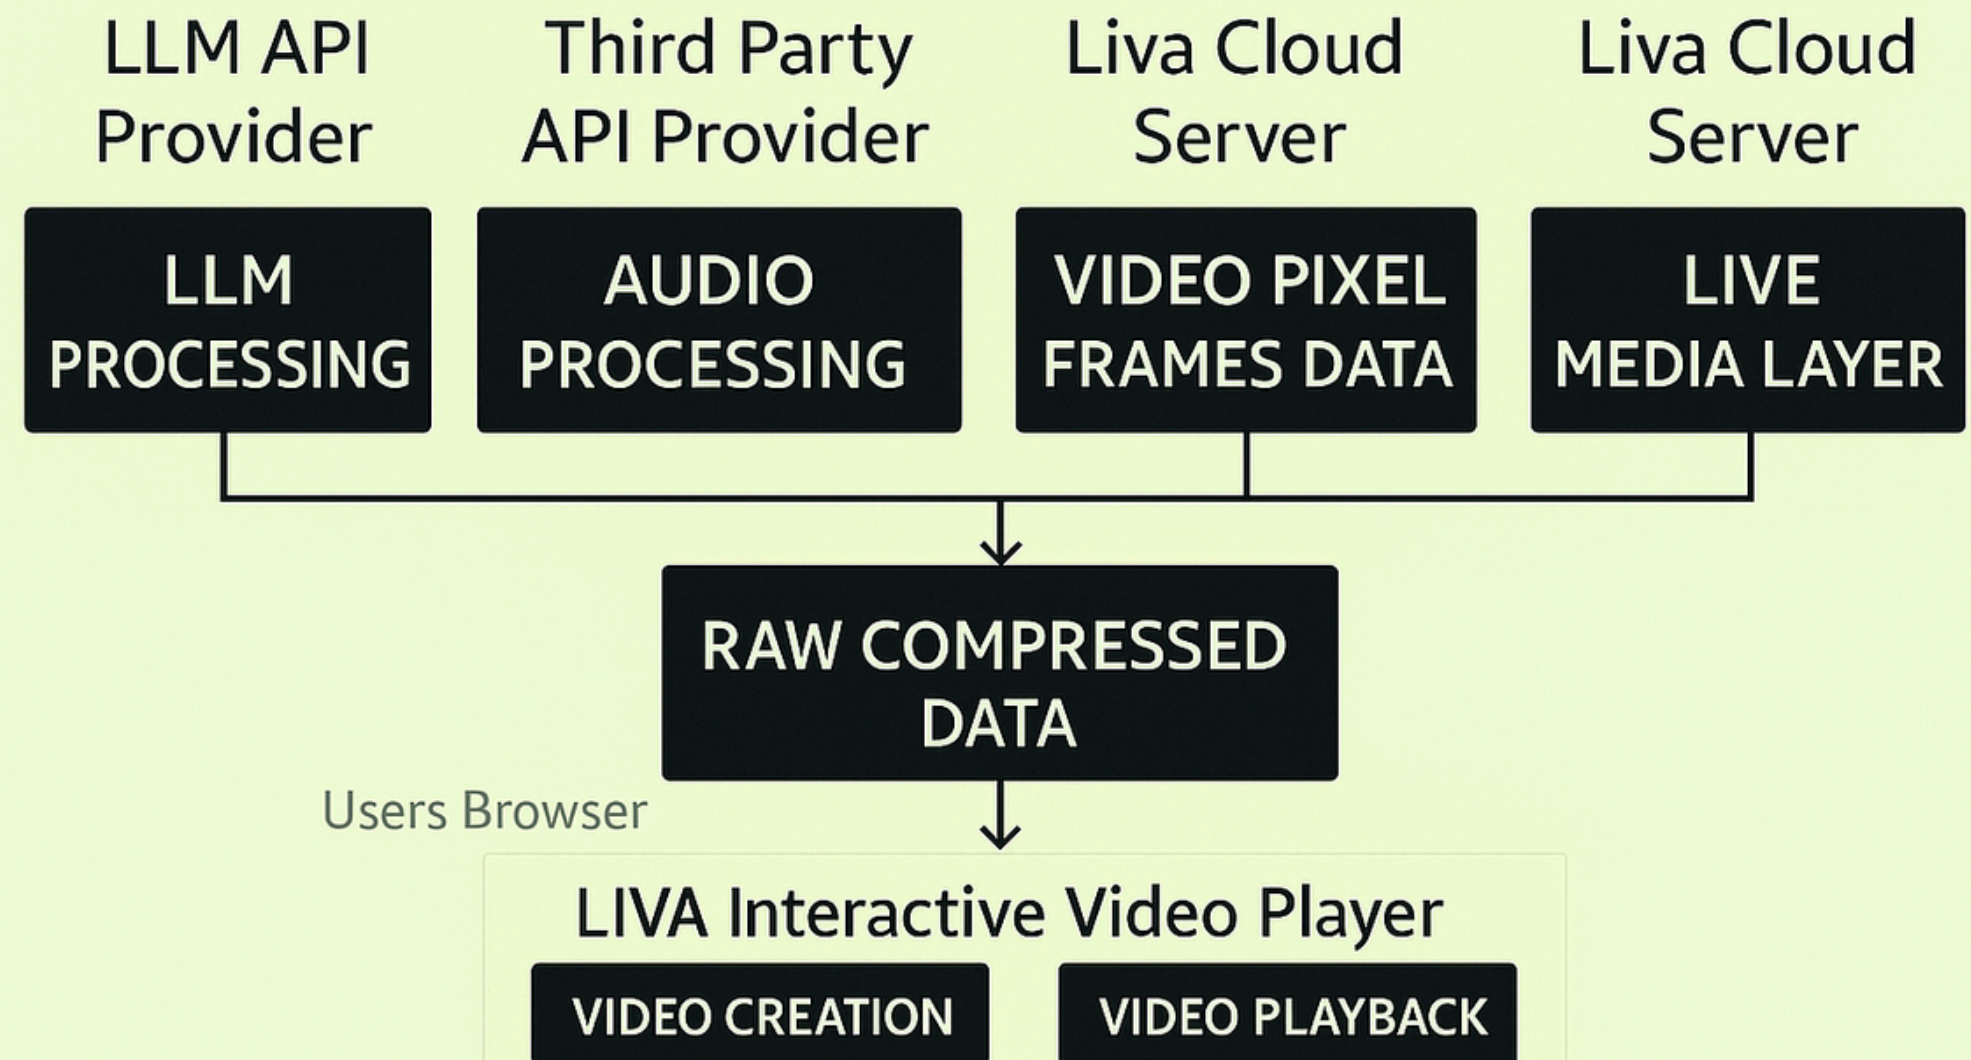

CORE TECHNOLOGY ARCHITECTURE

Current Live Streaming Methods

LIVA

Interactive Streaming Protocol

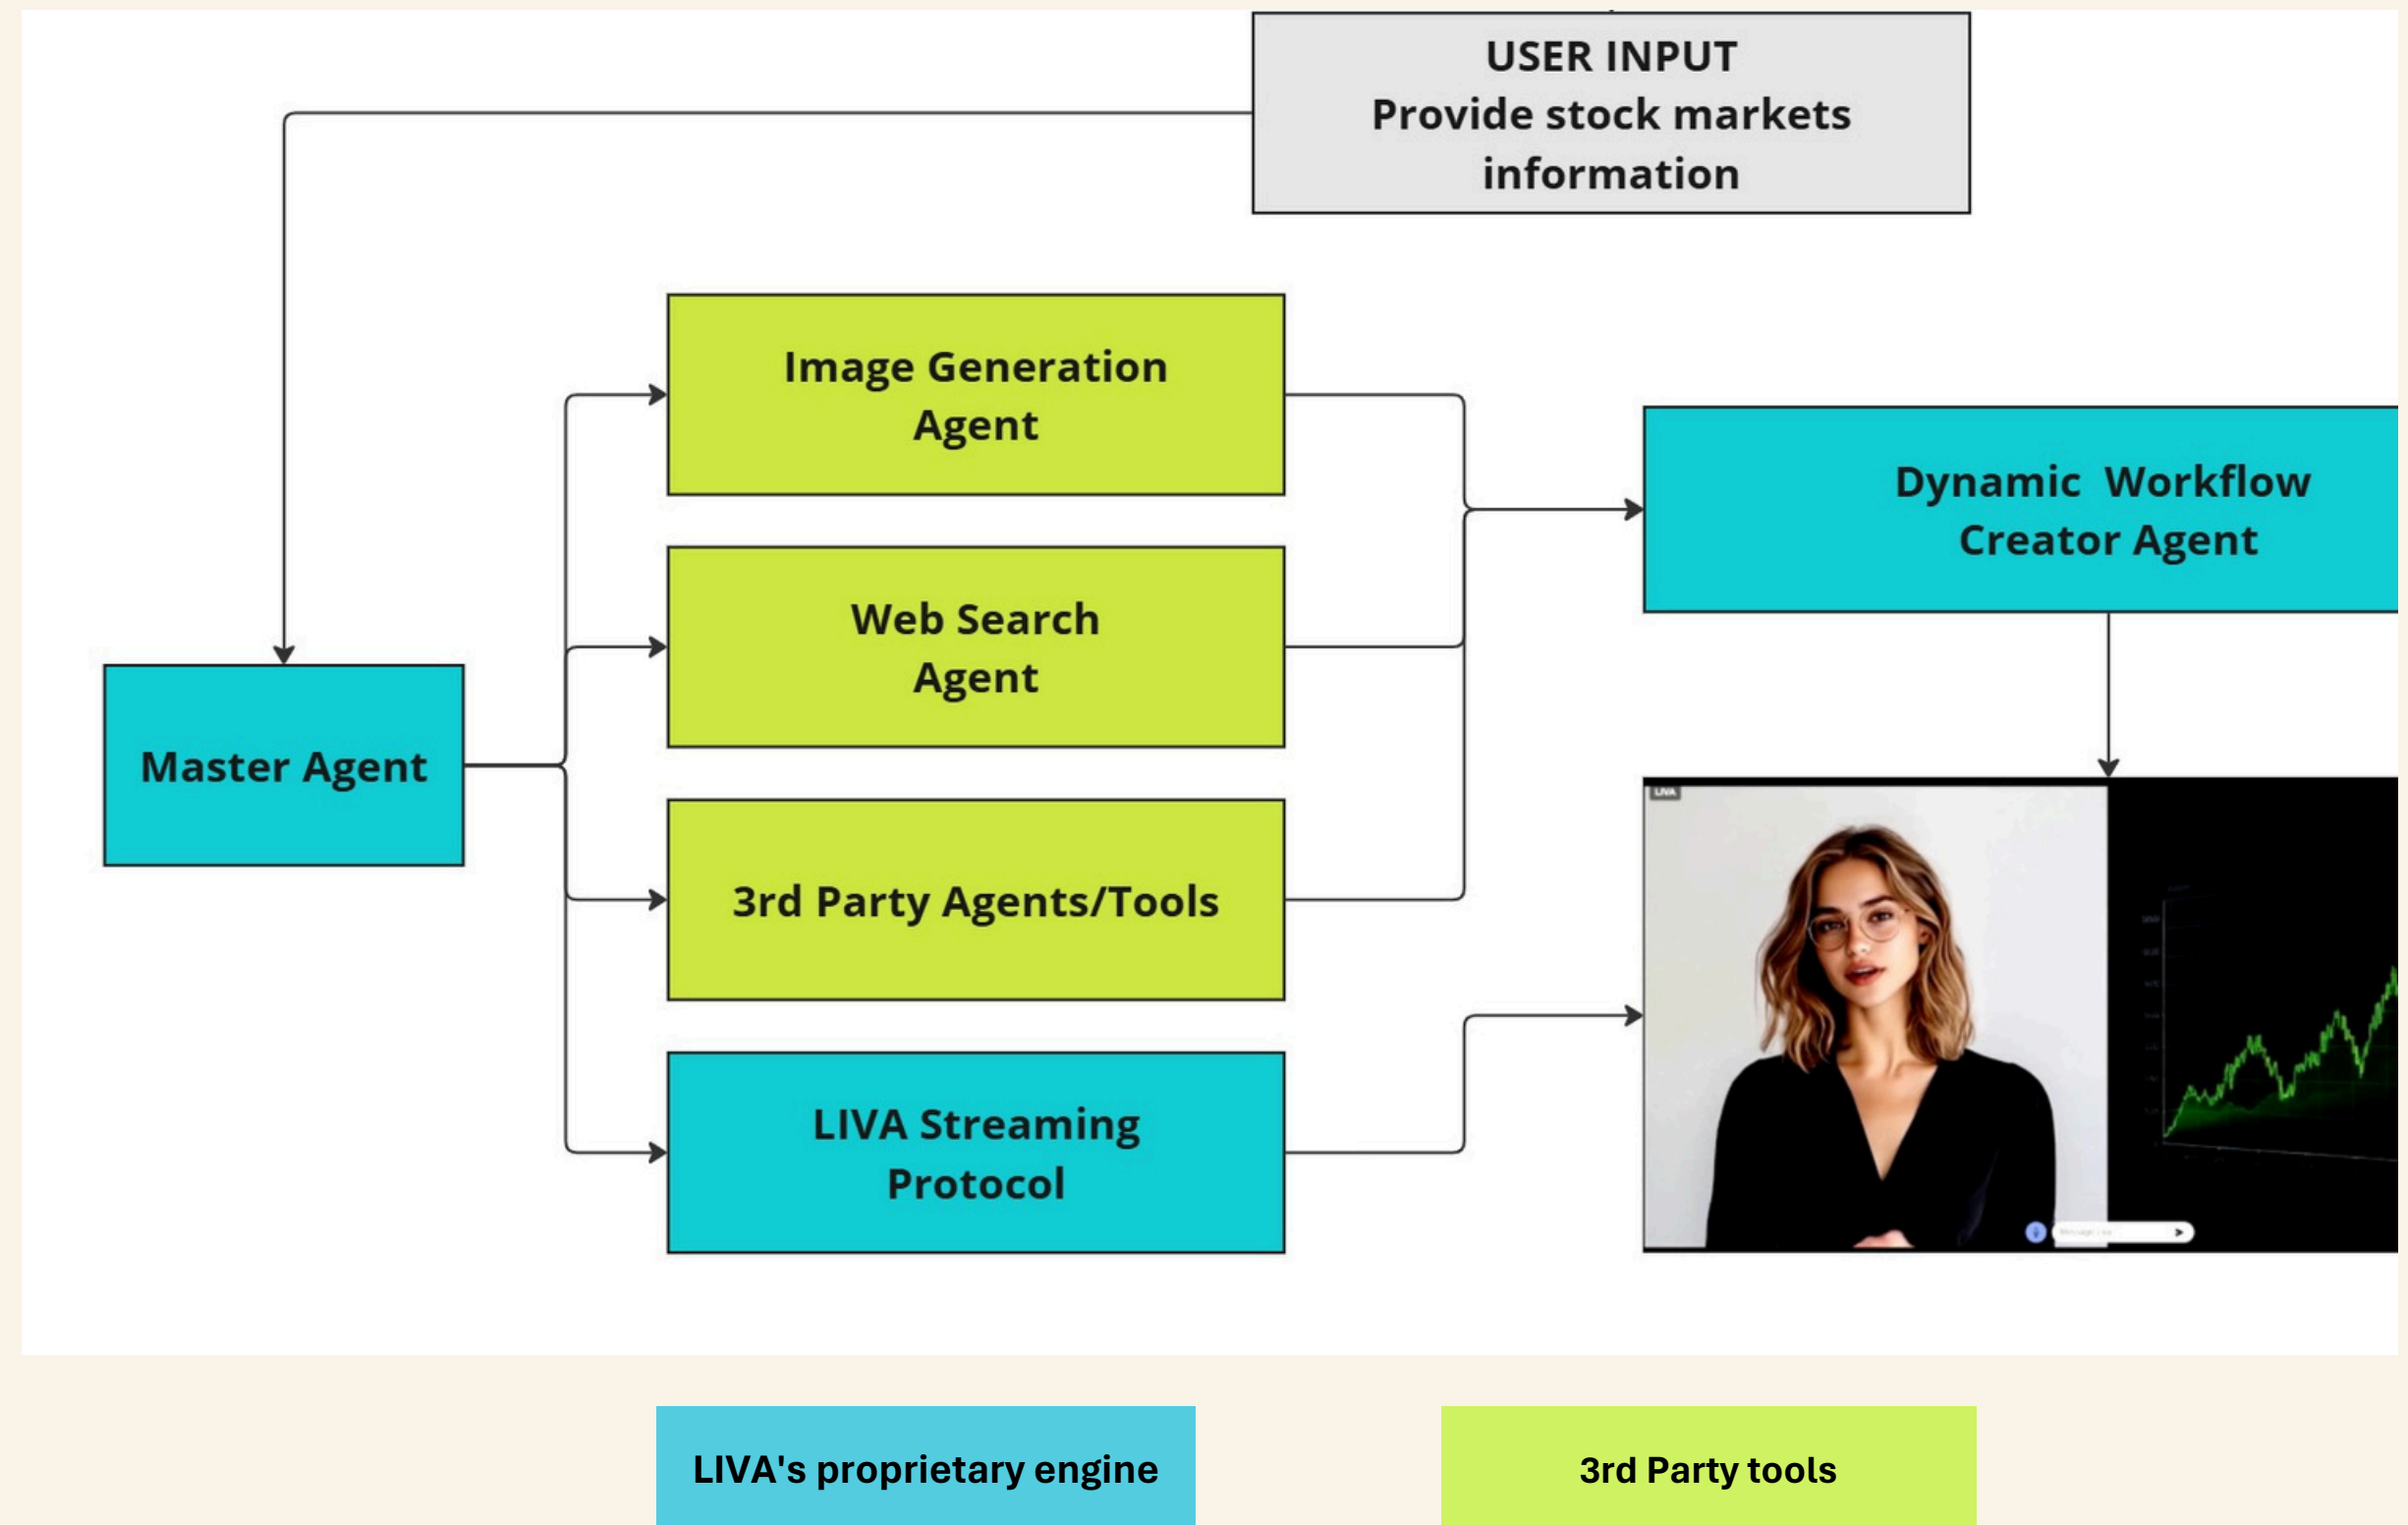

AUTONOMOUS WORKFLOW PIPELINE

Master AI Agent autonomously manages complex queries

Instantly delegates tasks to **specialized sub-agents**

Connect seamlessly with **third-party APIs** (audio services, web search)

WHERE WE ARE

✓ V1.0 (Current MVP)

- Native real-time video player
- Interactive media interface
- Multi-prompt text & voice handling
- Lip-Sync & visual streaming
- Real-time web search & integrations

WHAT'S NEXT

🚀 V2.0 (Upcoming Enhancements)

- **Ultra-Realistic Lip Sync** improvements
- **Real-time Emotions:** Happy, Sad, Angry, Shocked
- **Real-time Actions:** Wave, hand gestures, realistic head and body movements
- Front-end visual & dataset enhancements for **lifelike realism**

REVENUE MODEL & MONETIZATION

Affordable SDK Access: \$0.001 per 1K tokens processed (Launch apps with 24/7 Video Feed for free only pay for tokens processed)

Subscription Tiers: Monthly/yearly subscription plans for SDK access (Basic, 10\$ Pro 30\$, Enterprise tiers)

Optional Customizations: Monetizing custom avatar creation & additional premium actions/emotions

KEY USE CASES

Live Web Support

Banks, insurance, healthcare,
government services

AI-Powered Agent Platforms

Leverage versatile AI agents
for industries and services.
Such as education,
medicine..

Content Creation

Instant AI-driven video content
generation, and various on
demand applications

Outdoor Applications

Retail & Sales Kiosks: In-store
interactive agents for
personalized customer
interactions

Potential multi \$B opportunities across multiple use cases

Strategic Partnerships & Roadmap

Deal Secured with Dubai Government (RTA Cabs)

Deploying LIVA-powered AI avatars in-car entertainment systems across all Dubai RTA cabs—humanizing passenger interactions at scale.

~est. \$50K ARR secured pre-launch

Strategic Alliances with Leading LLM Providers

Establishing partnerships with OpenAI, Google, Anthropic, Perplexity, and Microsoft to broadly integrate visual AI agents with their LLM platforms.

Public SDK Launch for Developers & Businesses

Officially releasing LIVA's customizable SDK to empower thousands of companies, startups, and developers to easily build expressive AI-driven applications.

FUNDRAISING

Raising Pre-seed of \$100K. Flexible check sizes (\$10–20K)

USE OF FUNDS

Develop V2.0 feature set (**emotions, actions, hyper realistic visuals**) Launch official SDK publicly

Develop dedicated **mobile SDK**/LIVA App showcase on **App Store** and **Play Store**

ADVISORY BOARD

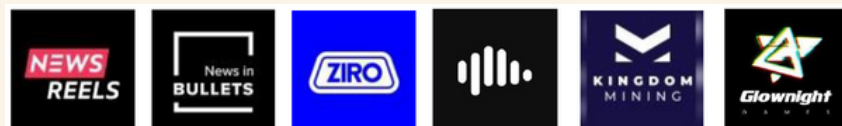

Actively recruiting advisors and strategic investors to enhance our AI, product, and go-to-market strategies, offering equity-based roles (~1–2%) to key contributors

Founding Team

Jai Rangwani

A proven tech founder with two successful exits. Expertise in Gaming, Crypto, AI, ML, digital innovation. Launched start-ups generating \$1 million ARR with with over 20 million downloads

Arant Agrawal

16+ years of experience operating at the intersection of technology and finance in senior roles at global leaders such as Amazon, Uber, and Binance, with significant expertise in strategy, M&A, and fundraising

Pico Valasquez

Expert in AI, blockchain, and emerging tech. Named one of the Top 100 Women of the Future and a Harvard University alum, she drives innovation at the intersection of technology and sustainability.

Thank You
